

CLIENT SPOTLIGHT SUPPLY CHAIN MGMT COMPANY

Supply chain and eCommerce organization achieves
30% cost reduction by moving to Azure

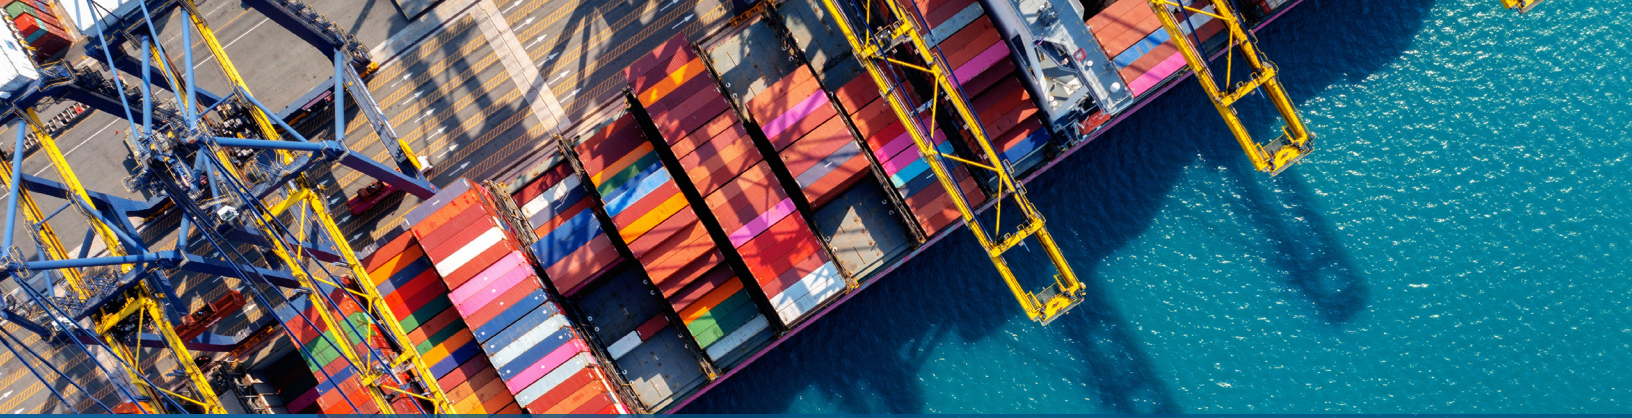

CHALLENGE

This client is a leading end-to-end global supply chain solutions and eCommerce provider. The company was eager to move from their on-premises solution to Azure driven by their need for enhanced security and a reduction in overall costs. It was crucial for them to exit the current on-premises data center with minimal interruption to operations, so they required a solution that would ensure a smooth transition. The company wanted a solution to provide a functional basis for internal financial applications and for a partner to educate their internal teams to effectively manage the new infrastructure. Budget was also a major concern; the deployment was heavily dependent on cost reduction, leaving no room for error. The successful execution of this transition would not only address the company's immediate challenges but also set the stage for long-term efficiency and innovation in the Azure Cloud environment.

SOLUTION

3Cloud engaged with the client to build a robust cloud security platform built on a solid foundation, facilitating a successful migration on a larger scale for the client. The migration to Azure consisted of a comprehensive infrastructure build, which included servers, storage, networking, BI, and more, ensuring a seamless transition. Additionally, the 3Cloud team provided a 90-day Managed Service contract coupled with educational resources, empowering the client to independently maintain and deploy solutions in-house. As a result of the data center migration, the client benefited from updated, lean and streamlined systems, leading to significant cost efficiencies.

RESULTS

3Cloud completed the successful migration of 300 servers in less than three months with the minimal interruption they desired. Furthermore, by building a robust cloud security platform, we improved critical security infrastructure, which has strengthened the client's resilience against potential threats, ensuring the integrity and confidentiality of their data assets. Most impactful, the updated and streamlined systems in Azure implemented as part of our solution has enabled the organization to achieve a 30% reduction in cost, plus optimized performance. By partnering with 3Cloud, the eCommerce & logistics provider paved the way for long-term cost efficiency, aligning their technology infrastructure with their broader business objectives.
