

MIGRATION JUMPSTART

Ensure a smooth migration to the cloud with an Azure expert

Change is inevitable. If it's time for a hardware or software refresh or you are facing "end of support" or the end of your data center contract, take advantage of this opportunity to migrate your on-premises servers to Azure.

By migrating to the cloud, you will be able to leverage the cloud's availability, scalability, and redundancy. You'll make the switch from costly capital expenditures to flexible operating expenses while ensuring robust security.

Why It Matters

3Cloud has performed thousands of migrations and is recognized by Microsoft as the top Azure partner in the world. Our architects and engineers are thinking about more than just getting workloads from on-prem to Azure. We are vested in ensuring the client is armed to operationalize the workload with monitoring, backups, and built in resiliency, with an emphasis on future state architecture, not just the immediate project goals.

Education

The training we provide to our clients during the planning stage ensures a successful migration with smooth business continuity.

Automation

Our automated migration capabilities ensure minimal downtime for our client's business critical applications.

Transformation

Your migration to Azure provides reduced IT costs and improved performance in a secure environment.

Our experience with 3Cloud was phenomenal and incredibly well managed. The folks at 3Cloud really worked to listen and understand what our problem was, and then worked with us to translate our bigger picture needs into specific solutions. They were always patient and explained all the fine details to us, no matter how many times they needed to pivot as things changed.

- Nat Moorman, PhD
Founder and Associate Professor, UNC School of Microbiology and Immunology

How It Works

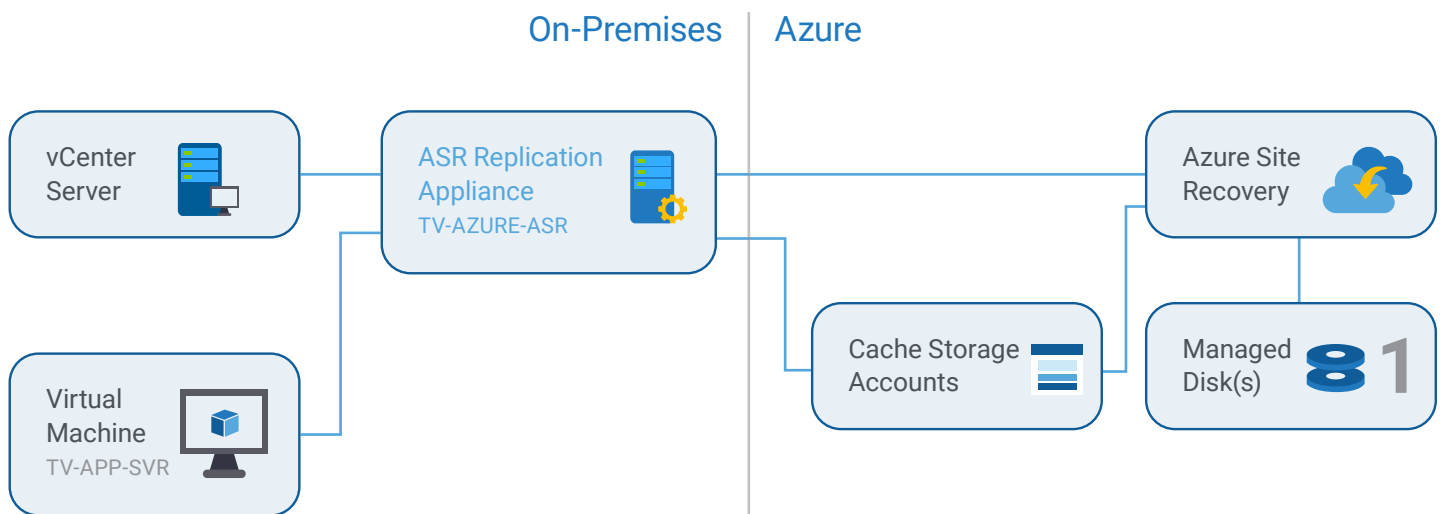

3Cloud will leverage its experience and expertise in Azure Migrations to assess, plan, and execute a migration, while avoiding common pitfalls, challenges, frustrations, and surprises often faced when attempting a complicated migration into the cloud.

Deliverables Include

- Application and Server Inventory List
- Azure Migrate Dependency Analysis
- Azure Consumption Estimate
- Migration Plan with Wave Tracker
- Azure Network Diagram
- Migration of Workloads in Azure

\$1B

Azure has built-in comprehensive security and compliance. Microsoft invests more than \$1 billion annually on cybersecurity research and development.

Migration Jumpstart may be eligible for Microsoft funding.

Why 3Cloud

3Cloud is your one accountable partner to deliver Azure infrastructure, data and analytics, and application development with the fastest time to value from our experience, tools, and accelerators. 3Cloud is the largest pure-play Azure partner in the ecosystem with unequaled expertise in Azure. We have hundreds of Azure experts, including MVPs and Fast Track Solution Architects, with thousands of hours implementing cutting edge solutions with Microsoft's most advanced technology.
