

MICROSOFT FABRIC WORKSHOP

Unpack Microsoft Fabric and reshape how your entire team uses data for a competitive advantage.

As the landscape of tools for data acquisition, data engineering, analytics and data science has grown, organizations are having to spend more and more time managing integrations and architectures across multiple platforms, which ultimately creates roadblocks and hurdles to the business being able to quickly and effectively make data-informed decisions.

Microsoft Fabric reshapes how everyone accesses, manages and acts on data and insights by connecting every data source and analytics service together – on a single, AI-powered platform.

In this two-day educational workshop, you will learn the architecture and capabilities of Microsoft Fabric, how it impacts current and future data and analytics initiatives and how to prioritize to receive maximum business value.

Why It Matters

Microsoft Fabric is an end-to-end analytics solution with full-service capabilities including data movement, data lakes, data engineering, data integration, data science, real-time analytics and business intelligence – all backed by a shared platform providing robust data security, governance and compliance.

Your organization no longer needs to stitch together individual analytics services from multiple vendors. Instead, use a streamlined solution that's easy to connect, onboard and operate.

All your data in one place, that is accessible to all teams across the business.

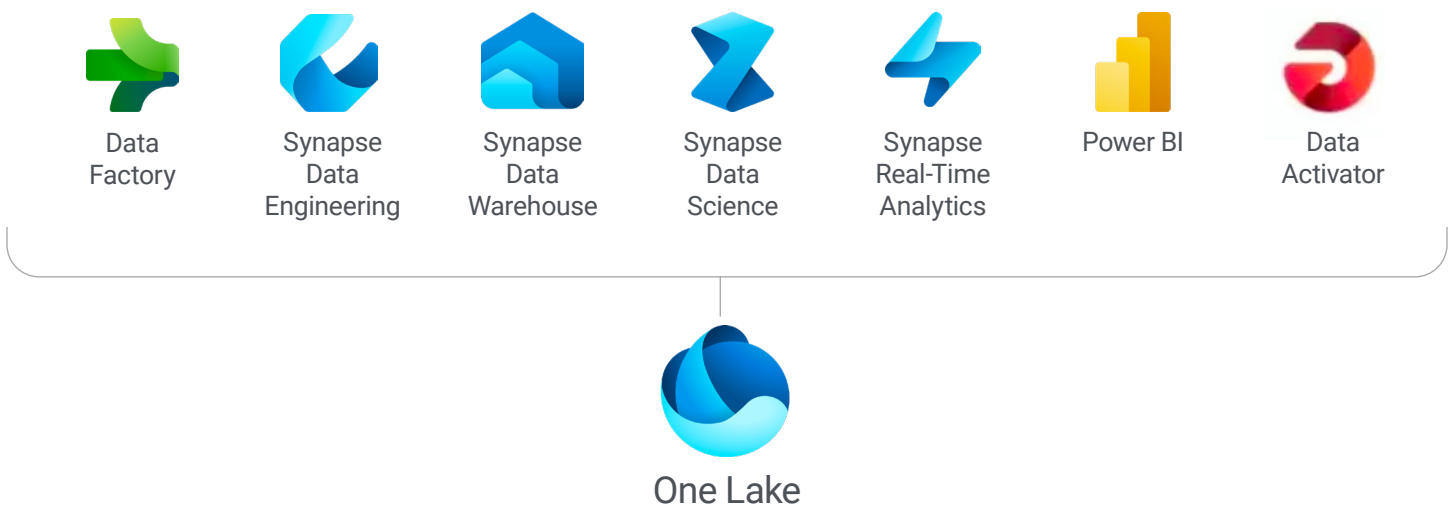

- Unify your data estate and have a single source of truth
- Manage powerful AI models
- Empower everyone in your business
- Govern data across your organization
- Leverage AI-powered capabilities
- Simplify cost management

How It Works

A two-day collaborative and educational workshop to get started with Microsoft Fabric and drive significant value in modern analytics and self service capabilities.

- Foundational education on the architecture and capabilities of Microsoft Fabric
- Uncover business value of Microsoft Fabric and impacts to current and long-term data and analytics initiatives
- Prioritize use cases for adopting Microsoft Fabric
- Create high-level adoption roadmap emphasizing managed self-service analytics

Microsoft Fabric Experiences

Microsoft Fabric Workshop may be eligible for Microsoft funding.

Why 3Cloud

3Cloud is your one accountable partner to deliver Azure infrastructure, data and analytics, and application development with the fastest time to value from our experience, tools and accelerators. 3Cloud is the largest pure-play Azure partner in the ecosystem with unequaled expertise in Azure. We have hundreds of Azure experts, including MVPs and Fast Track Solution Architects, with thousands of hours implementing cutting edge solutions with Microsoft's most advanced technology.
