

DEVOPS & AUTOMATION

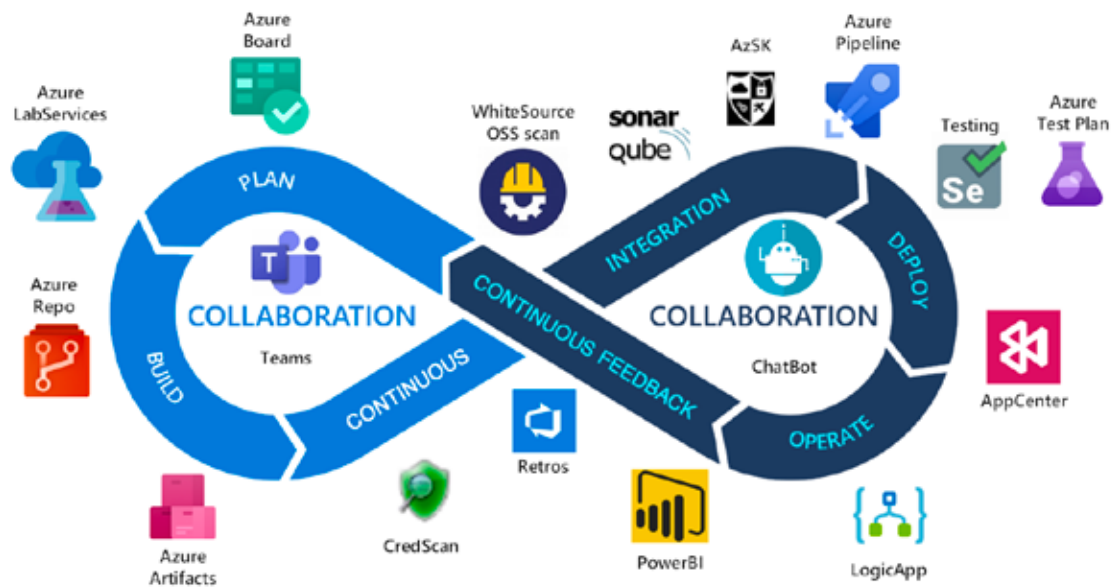

Accelerate the release of deliverables to stay ahead of the competition

Speed delivery times and provide continuous value to your customers with DevOps, a complete collaboration of process, technology and people. Automate your processes to reduce human error and ensure repeatable success, so your products and services maintain the highest quality. Automation also saves time, freeing up your team for innovative thinking.

Amp Up Your Delivery Process

- Accelerate release of deliverables to stay ahead of the competition.
- Foster cross-functional collaboration between departments.
- Streamline deployment processes to ensure top quality.
- Detect threats faster with automated and continuous testing.
- Increase customer satisfaction by utilizing feedback loops.

Capabilities

DevSecOps & SRE In DevSecOps, we assist clients in integrating security across automation and platform design for the IT lifecycle. Prioritizing early security measures, we automate gates to maintain efficient DevOps workflows. 3Cloud enables the infusion of security into your continuous delivery pipeline, empowering teams to address pressing security challenges swiftly. Cloud solution success hinges on reliability. Site Reliability Engineering (SRE) involves principles and practices for scalable, dependable software systems, which we guide clients in implementing.

Platform Automation Platform Automation scales changes via automated processes, benefiting organizational expansion beyond basic configurations in security, governance and management. It's integral to implementing a landing zone, fostering repeatable, scalable environments. This approach streamlines Azure Landing Zone tasks – development, deployment, provisioning and operations – leveraging tools like Azure DevOps Services or GitHub.

Quality Engineering Building applications requires engineering discipline and quality processes. 3Cloud prioritizes quality from ideation, aiming for future-proof app quality across the development lifecycle. Our approach adopts an automation-first mindset, maximizing effort for immediate and future app evolution.
