

AI Strengthens Competitive Edge

Pioneering GenAI Chat App Enhances Client Service Experience Worldwide

Cognitive Services | Azure OpenAI

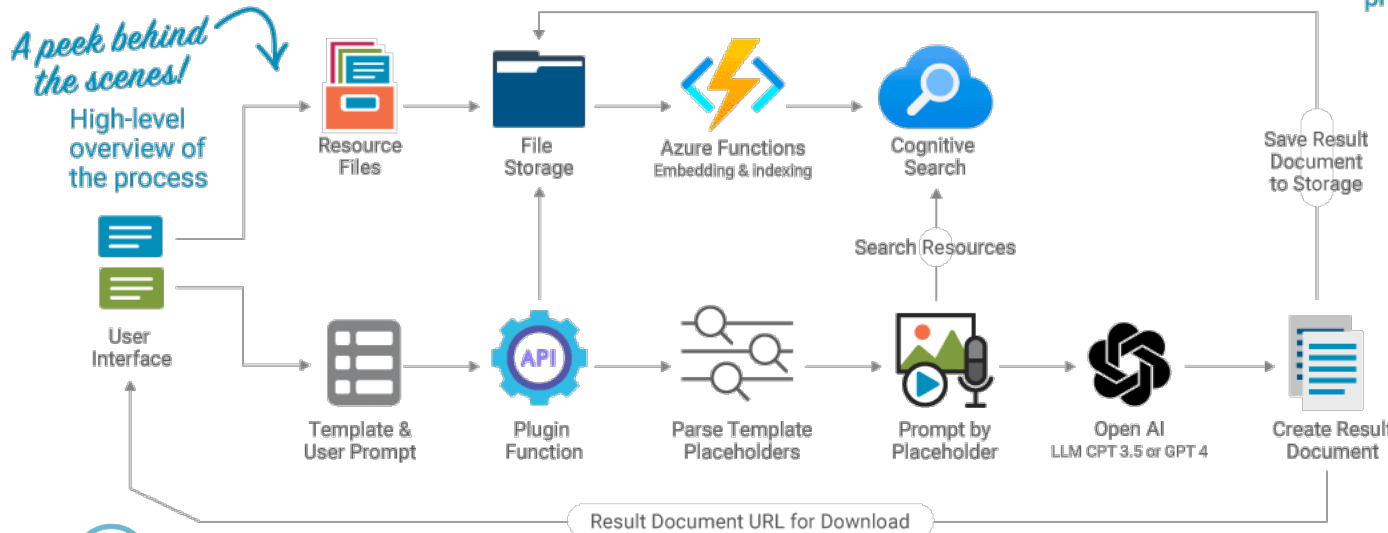

PROBLEM + NEED

- Desire to level up AI capabilities and offerings
- 3-Year AI roadmap initiative to enable AI-driven insights & processes

SOLUTION + RESULT

- GenAI-driven app deployed to 80K global users
- Increased ability to process complex tax & audit data at faster speeds
- Minimized human error & improved accuracy
- Enhanced reliability & client trust; strengthened competitive edge

AI COMPLEXITY LEVEL

All-in-one!
Easy access to topics, prompts, favorites, data sources, plugins and more.

Super easy to create custom prompts.

Agile Delivery Transformation
Transform and determine delivery.

EDGAR www.sec.gov. Last updated Nov 2023.

I can assist with research questions and summarize common themes and differences among peer companies, focusing primarily on the MD&A and footnotes to the financial statements. Some examples of topics you can ask me questions about include the following:

1. Accounting Policies and Estimates: Companies' significant accounting methods, policies, and estimates, including any changes made during the reporting period.
2. Fair Value Measurements: Details about companies' fair value measurements of financial instruments, investments, and other assets or liabilities.
3. Commitments and Contingencies: Information about pending legal cases, warranties, and long-term contracts that may impact future financials.
4. Segment Reporting: If applicable, reporting on the company's operating segments and their performance.
5. Business Combinations: If applicable, details on mergers and acquisitions, purchase price allocations, and goodwill.

Please note that my response time may vary based on the number of companies included in your question. Thank you for your patience as I read through all these financial statements!
