

AI ROADMAP

Uncover, Rationalize & Prototype Your Important Use Cases

The era of AI is here, and it's reshaping the future of work across all industries. Gain a competitive edge and experience the benefits of AI-driven innovation with 3Cloud and Microsoft Azure. Guided by your unique needs, we implement and operationalize your top-value generative AI use cases. We streamline the journey, building and strengthening your AI foundation while ensuring security, scalability and alignment with your business goals. Accelerate innovation securely with our generative AI experts and transform your world today.

of organizations said they use AI in mission-critical processes to better compete*

Why It Matters

Looking to understand where to focus your AI efforts for maximized business impact? 3Cloud's AI Roadmap is designed to discover, rationalize, prioritize and prototype your AI use cases based on business value and ROI. No matter where you are on your AI journey, we help enable, measure and scale the positive impacts of AI by promoting an AI-enabled organization. Our architects work with you to augment human potential with AI, beginning with use case discovery and rationalizing and moving directly into rapid prototyping of your most valuable use case. Let us show you how to take your vision into reality with a concrete implementation plan that gives you confidence that AI can increase efficiency and solve problems for your organization in a tangible way.

How It Works

We'll collaborate with your team to identify, prioritize and prototype AI use cases. We have a strong, repeatable process designed for AI engagements. Beginning with use case discovery and rationalization, we then move into rapid prototyping, and conclude with a detailed implementation strategy for enabling your generative AI on top of a strong AI Foundation. We come armed with the latest patterns, practices, tools and shortcuts to move you quickly from ideation to prototype and concrete plan.

Rationalize Use Cases Through targeted workshops, you'll gain industry-specific insights and expert guidance on integrating AI into your business operations. We help you identify and prioritize AI-driven solutions tailored to your strategic goals, ensuring each initiative is backed by solid business impact assessments. Embark on your AI journey with a clear, actionable roadmap to transformation.

Build Confidence Through our interactive live prototyping and high-level proof of concept (POC) sessions, you'll see firsthand what your potential AI solutions could achieve. Engage in "Art of the Possible" demonstrations, whiteboard sessions and hands-on prototyping to refine requirements and designs. Our goal is to simulate real-world performance using your data, enabling you to visualize the impact and effectiveness of the solution, ensuring that the final product aligns perfectly with your expectations and business needs. Build trust and gain assurance as we transform theoretical AI potential into a demonstrable prototype.

Create a Plan Collaborative planning and architectural design ensure a smooth transition towards realizing your top priority AI use case. Engage in detailed planning sessions where we utilize agile methodologies to create a prioritized backlog, capturing key implementation requirements and building a robust project proposal complete with timelines and cost estimates. We will design a tailored Azure architecture that aligns with your specific data flows, integrations and future state requirements. By the end of this phase, you will have a comprehensive, production-ready architecture plan, enabling you to move forward with confidence towards deploying a transformative AI solution.

Establish a Vision Lay the groundwork for transformative AI success with a clear and actionable roadmap for your generative AI initiatives, aligning early projects with your strategic 12-month goals. We'll help you identify crucial projects and evaluate your foundational readiness, ensuring your business is primed to leverage AI at scale. Together, we develop a strategic plan that assesses your data estate and application readiness and sets the stage for effective AI integration across your organization.

Accelerate Your Azure Journey With 3Cloud

3Cloud is the premier pure-play Azure partner in the ecosystem with unparalleled expertise in all things Azure. We specialize in delivering top-tier Azure infrastructure, cutting-edge AI, robust data & analytics and ground-breaking app development. Leveraging our extensive experience, advanced tools and customized accelerators, we ensure the quickest time to value for your Azure-based projects.
