GDC Helps Develop & Deploy AI-Powered Platform to 80K Users Worldwide

The Challenge

- Big 4 tax & audit firm needed to create a new AI-powered platform for their 80K users worldwide
- They wanted a secure, reliable & effective system to handle audit, tax and consulting services
- Client needed to platform to be deployed rapidly and be price conscious

The Solution & How The GDC Helped

- A cornerstone of 3Cloud's strategy was the scaling of delivery, from prototype to full implementation using their dedicated Global Delivery Center (GDC)
- By utilizing GDC, our team was enabled with faster project completion with an increased team size & extended workdays outside of normal US hours
- Speed of delivery without increased cost meets client's time & financial constraints
