

Discover why 3Cloud is the #1 Microsoft Azure partner and what sets us apart

3Cloud helps organizations migrate and modernize their infrastructure, data and applications. With our unequaled expertise in Azure, we have implemented Microsoft’s most advanced technology for hundreds of enterprise clients – enabling them to master resilience in the new digital world.

Human Led, Tech Driven

We believe a brighter future is created through human brilliance and transformative technology. 3Cloud brings together a community of passionate innovators and experts along with the most trusted and comprehensive cloud platform, Microsoft Azure, to work towards that future. We don’t just create to create, we innovate to meet human needs – and we do it brilliantly.

Digital Modernization is an IMPERATIVE, not a choice. You have to do more with less. Doing more with less doesn’t mean working harder or longer, it means applying technology to amplify what you’re able to do across your organization for greater business impact. **Pairing technical depth with business clarity so you can:**

- Improve Client Engagement
- Deliver Differentiated Client Experiences
- Empower Employees to Thrive
- Reduce Risk and Optimize Operations
- Create New Revenue Models
- Build Unfettered Growth

Diverse Perspectives Lead to Big Ideas

A cultural shift is inevitable when you want to drive more impact. It takes insight from all sides. When everyone feels empowered to innovate, they take risks and experiment with new ideas that will change your business and your industry. Our network is unmatched – we empower and connect our clients, Microsoft, 3Clouders, the innovators, change agents and solution solvers. **No other Microsoft Azure partner can match this.**

Client Impact

3Cloud customers generate and manage over **\$49B of annual revenue** in our digital economy. We bring more than three decades of technology and services leadership to our client industries including retail, manufacturing, healthcare, financial services, sports & entertainment and more.

We're committed to **drive sustainability** by reducing our customers' carbon emissions by migrating workloads to Azure. Over the last year, 3Cloud has completed over 1,200 Azure migrations offsetting a combined 320,000 metric tons (est. 42,000 US households) of carbon emissions by running in Azure vs. on-premises.

Gordian, a \$6B construction services firm, developed an innovative AI platform to streamline the proposal review process, saving \$6M annually. The time to complete a proposal review went from 5 hours to less than 1 minute and decreased proposal errors by 90%, leading to an overall impact of 40% increase in profit margin.

Tenet, a \$17B healthcare services company, developed and deployed a new Azure cloud-native based app for its payor system and is now able to process 5M messages per day as compared to 2M messages per day and removed \$1M of operational cost.

Dow Chemical, the 2nd largest chemical company in the world, developed an Azure-based IoT analytics solution to monitor plants and help reduce environmental impact. This solution increased worker safety across 104 plants and led to \$78M in annual savings via improvements to operational maintenance cycles.

Our Clients Are the Purpose

Our passion for client success is unmatched. 3Cloud clients build resiliency with cloud adoption as the foundational key to the digital imperative and leverage data to fuel their next generation of products and services. No other Microsoft partner invests more resources to help drive measurable outcomes towards digital resilience.

Our Partnerships

We've seen what's possible when extraordinary people and technology come together. Our strategic partnerships help deliver innovative solutions and measurable outcomes for our clients.
