

# Secure from code to cloud

Enhance security during and after migration to **Microsoft Azure**

The best innovations come backed by world-class security. 3Cloud's Azure-based solutions offer multilayered protection across cloud workloads, reducing risk within hybrid and multicloud environments.

## Unmatched foundational security

Azure provides a secure foundation with multilayered data protection monitored by thousands of security experts.

**10,000+**  
full-time security professionals.

**65 trillion**  
global signals daily.

**\$20B**  
security investment over the next five years

**100+**  
compliance certifications leader in the cloud industry

## Comprehensive, built-in security

Copilot for Security

Microsoft Defender for Cloud

Microsoft Sentinel

Azure network Security

Confidential computing

GitHub Advanced Security

*Microsoft Defender for Cloud:* Azure is the only cloud that offers native app protection for workloads and app lifecycles.

*Copilot for Security:* The first generative AI security product protects at the speed and scale of AI.

## Azure security: A customer profile

Del Monte Foods overcame high costs, complexity, and security challenges by migrating to Azure and deploying Microsoft Defender for Cloud.

50%

reduced security risk.

40%

improved system performance.

57%

reduced costs.
