

UNIFIED DATA PLATFORM JUMPSTART

Unlock the Full Potential of Your Data

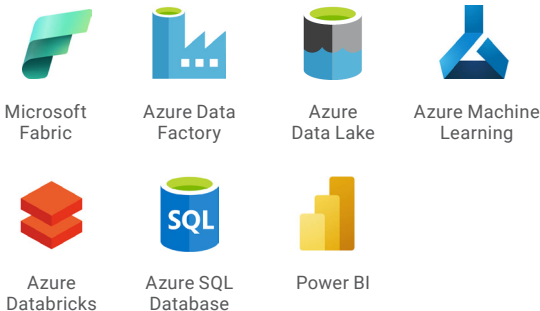

Your data is a goldmine with immense business value. To tap into its full potential, you need a unified data platform and a solid data governance strategy. A well-architected data platform is built with modern, secure, scalable lakehouse and warehouse cloud services. It empowers your team members to uncover meaningful insights and your leaders to make informed, confident decisions.

Why it Matters

A unified data platform is crucial for advancing AI initiatives from proof of concept to delivering measurable value. It serves as the foundation for effective analytics and drives AI initiatives forward with clean, reliable and properly modeled data.

AI-driven innovation requires a robust, scalable and secure platform to harness the power of your data. Building the right architecture, services and patterns can be challenging. 3Cloud's unique metadata-driven framework to efficiently ingest and transform source data helps you create a futureproof and cost-effective data platform.

3Cloud leverages powerful Azure Services

Empower with Data

Accelerate AI initiatives with clean and well-organized data.

Make Smarter Decisions: Use governed data to drive better business choices.

Save Money: Optimize costs with efficient and future-proof cloud tools.

Manage All Your Data: Access a unified, scalable platform for your specific needs.

Achieve Simplicity: Benefit from a secure, intuitive platform.

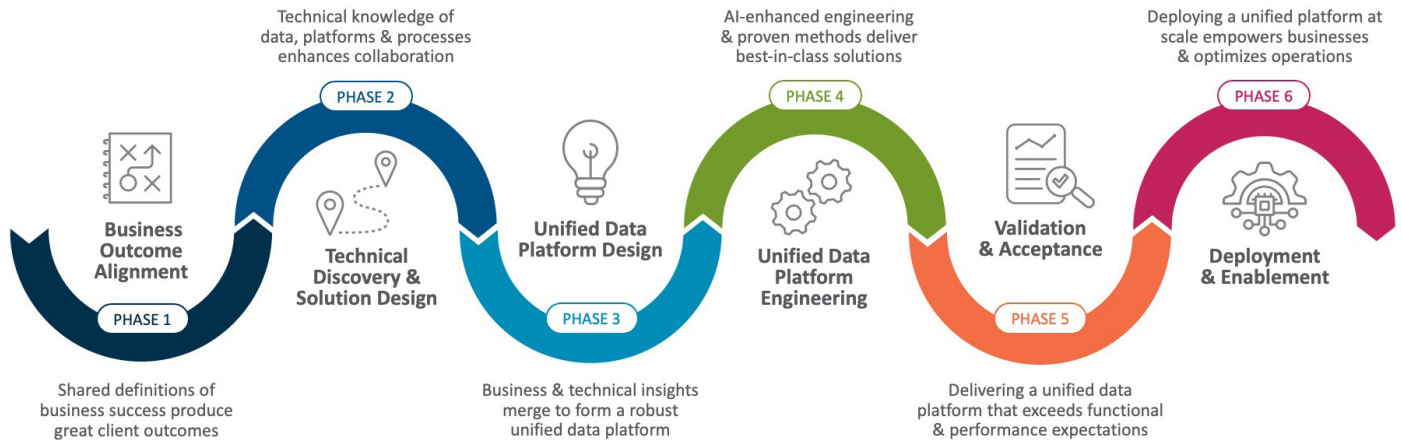

Gain Faster Insights: Quickly access actionable insights with data modeled within unified data platform.

3Cloud's strategic partnership with Microsoft helped our client

- ▶ Avoid \$2M in upgrade costs
- ▶ Improve data processing speed by 5-7 times
- ▶ Eliminate downtime issues
- ▶ Empower staff with self-service analytics

How it Works

The Unified Data Platform Jumpstart is a unique and comprehensive framework that accounts for the full lifecycle of modern analytics and AI use cases, from deploying your first Azure data service through managed adoption and support of self-service capabilities. This four-to-six-week jumpstart solution aligns with strategy and connects technical solutions with the people and processes necessary to fully realize the value of your data.

Engagement Deliverables

Azure experts from 3Cloud will facilitate workshops with your team to outline, plan and provide best-in-class deliverables designed to effectively guide your unified data platform from the beginning.

- Single Azure environment configured with Azure Data Services
- Functioning data pipelines for data ingestion of client data source
- Functioning ELT to curate the data ingested for consumption
- Data consumption solution oriented to client's selected use case
- Engagement summary containing:
 - Summarized Azure services and data pipelines deployed
 - Summarized use case solution as built
 - Roadmap, including timeline and cost estimates for enterprise scaleout

Your next Azure engagement may be eligible for Microsoft funding

Accelerate Your Azure Journey with 3Cloud

3Cloud is the premier pure-play Azure partner in the ecosystem with unparalleled expertise in all things Azure. We specialize in delivering top-tier Azure infrastructure, cutting-edge AI, robust data & analytics and ground-breaking app development. Leveraging our extensive experience, advanced tools and customized accelerators, we ensure the quickest time to value for your Azure-based projects.

*Microsoft Partner Top Honors since 2017. Visit 3cloudsolutions.com for a full list of awards.
