DELIVERY APPROACH
Insight-Led Innovation

3Cloud drives impact through intentional, collaborative and purposeful innovation, combining human expertise with tech-driven solutions. This approach ensures better performance, faster execution, increased agility and scalable power. We believe in a brighter future powered by human brilliance and transformative technology. By uniting passionate innovators and experts with Microsoft Azure, we innovate to meet business needs. **And we do it brilliantly.**

Intentional
Our phased approach is driven by business outcomes & leverages best-in-class, proven methodologies.

Collaborative
We align the right team for each phase, ensuring productivity & faster time-to-market.

Purposeful
Our delivery tools speed up development, allowing the team to focus on unique client features.

Our People
Leveraging expertise to ensure tailored, high-quality solutions for our clients

900+ highly-skilled employees

15yrs average Azure experience
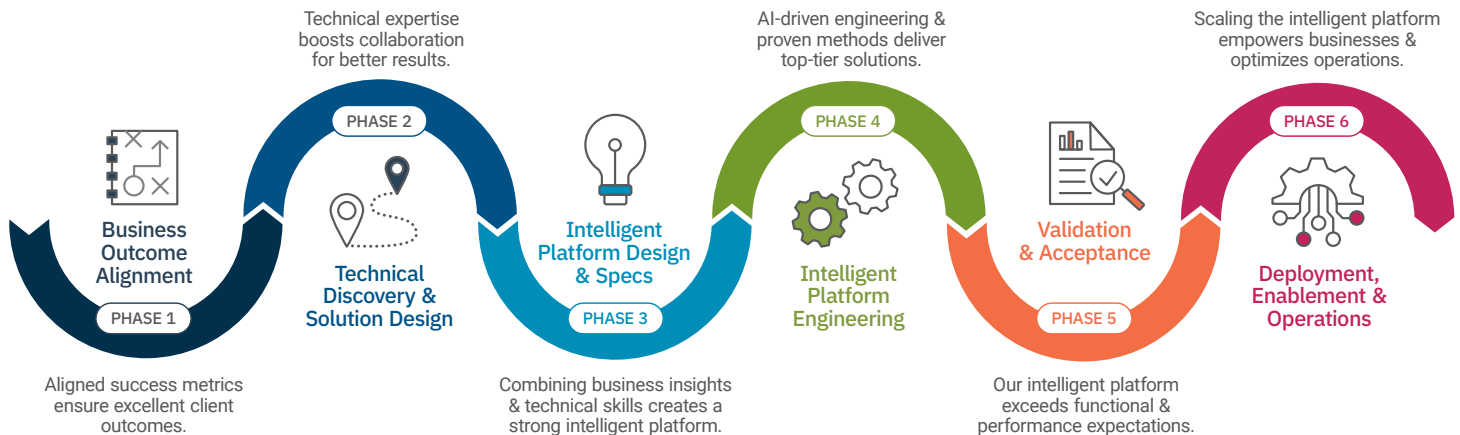

99% have Microsoft certifications

Our Delivery Tools
Ensuring efficiency, consistency and high-quality outcomes for every project.

3x faster average time to value

96% reduction in client onboarding time

1-2wks of development time saved

Technical expertise boosts collaboration for better results.

AI-driven engineering & proven methods deliver top-tier solutions.

Scaling the intelligent platform empowers businesses & optimizes operations.

PHASE 2
PHASE 4
PHASE 6

Business Outcome Alignment
PHASE 1

Technical Discovery & Solution Design

Intelligent Platform Design & Specs
PHASE 3

Intelligent Platform Engineering

Validation & Acceptance
PHASE 5

Deployment, Enablement & Operations

Aligned success metrics ensure excellent client outcomes.

Combining business insights & technical skills creates a strong intelligent platform.

Our intelligent platform exceeds functional & performance expectations.

Our six-phased approach is driven by purpose & business outcomes.

Technical Delivery Assets

The following chart outlines the key elements that drive our efficient and high-quality delivery of 3Cloud services. Our Technical Delivery assets each contribute to our streamlined processes and enhanced collaboration. These valuable assets are included in every client engagement, ensuring that our solutions are robust, scalable and tailored to meet your specific needs.

NAME	DEFINITION	VALUE
FLEXIBLE FRAMEWORKS	Guidelines that manage the process of designing, developing & delivering 3Cloud services.	• Enhances collaboration with quick access & reusable components. • Standardizes delivery across teams.
DIGITAL ACCELERATORS	Prebuilt code or technology that enables 3Cloud to deliver solutions quickly & repeatably. Our accelerators ensure quality at speed through engineering best practices, speeding up time to market.	• Improved efficiency • Faster development by avoiding the need to build from scratch • Informed decisions & continuous improvement over time
REUSABLE COMPONENTS	Prebuilt component libraries & reusable UI components streamline development & can be shared or imported into applications.	• Saves time by avoiding need to build from scratch • Reduces need to recreate code for every project • Single source of truth across all UI/UX projects. • Standardized components avoids incompatibility

Below is a sampling of the most popular assets we've designed to accelerate and enhance our solutions. **For a complete list of our Technical Delivery Assets, please contact us to start the conversation.**

Flexible Frameworks

Reference Architecture
Limits rework & redesign with proven architectures

Delivery Templates
Outlines necessary decisions & how to make them.

Delivery Playbooks
Library of 100+ playbooks for every lifecycle phase

Estimating Tools
Ensures accurate estimation & resource assignment

Digital Accelerators

Client Engagement, AI
Reduces onboarding by 96%

Delivery Fundamentals, AI
Increases efficiency, saves time & enhances collaboration

Fabric Metadata
Pre-built assets that greatly accelerate data ingestion

Databricks Metadata
Library of reusable, standardized & stable code

Reusable Components

Power BI Automated Semantic Model
Reduces redundancy with centralized metadata for discoverability & reusability

Power BI Monitoring
Enhances governance, compliance & visibility

Power BI Tenant Analyzer
Enhances governance & security by accessing patterns & risks.

AI-Assisted Code Review
Ensures maintainable, secure & scalable software

Accelerate Your Azure Journey with 3Cloud

3Cloud is the premier pure-play Azure partner in the ecosystem with unparalleled expertise in all things Azure. We specialize in delivering top-tier Azure infrastructure, cutting-edge AI, robust data & analytics and ground-breaking app development. Leveraging our extensive experience, advanced tools and customized accelerators, we ensure the quickest time to value for your Azure-based projects.

*Microsoft Partner Top Honors since 2017. Visit 3cloudsolutions.com for a full list of awards.
