Data & AI Focus

Enhancing Data Accessibility, Scalability & Analytics with a Modern Data Platform

PROBLEM

- Reliant on on-prem data centers, leading to a costly security breach
- Recognized the urgent need for an IT overhaul
- Concerned about the integrity of their environment.

SOLUTION + RESULT

- Established end-to-end Modern Data Platform supporting growth & innovation.
- Built scalable, high-performance & secure cloud data platform.
- Deployed data ingestion accelerator for efficient new data source setup.
- Implemented DevOps for source control & automated CI/CD deployments.
- Enabled client to fully utilize & maintain the Modern Data Platform.
