[Employees](#)  
1,000+ globally

3Cloud is the top pure-play Azure partner in the network, specializing in delivering top-tier infrastructure, cutting-edge AI, robust data & analytics and ground-breaking app development. Leveraging our extensive experience, advanced tools and customized accelerators – we ensure the quickest time to value for your Azure-based projects.

## The Intelligent Platform

An intelligent platform is the backbone of an AI-enabled enterprise. It's not a one-time build, but an evolving technology foundation that matures with your business continually adapting and delivering value. An intelligent platform can support the entire AI lifecycle, seamlessly integrating essential tools and platforms to transform AI into a strategic asset that drives business growth and keeps you ahead of the competition.

- **Experiences:** Intuitive design for seamless user interaction & adoption.
- **Tech Enablement:** Modern data stack to activate & manage AI.
- **Leading AI Platform:** Azure offers scalable, secure tools for AI model development & management.
- **Enterprise Integration Platform:** Streamlines data flow & boosts processing efficiency.
- **Unified Data Platform:** Integrated, accessible data fuels AI-driven innovation & decision-making.
- **Secure Cloud Platform:** Superior security & compliance ensures management & protection of cloud resources.

# Enhancing Data Intelligence with AI

## KEY TECHNOLOGIES

MICROSOFT FABRIC

DATABRICKS

As a global leader in backup, recovery and data management solutions, this company faced limited advanced data intelligence capabilities, hindering insights and decision-making. A data analytics framework was developed to automate key metric tracking and enhance data governance using AI for data classification enabling subscribers to gain valuable insights and visualize their M365 data estate.
