

MIGRATING FROM SYNAPSE TO MICROSOFT FABRIC

Achieve 379% ROI Over Three Years

Migrating from Synapse to Microsoft Fabric isn't just a tech upgrade, it's a transformative step for your data management and analytics.

With Microsoft's future development focused on Fabric, migrating from Synapse ensures you stay ahead with cutting-edge features and unified analytics. **With 3Cloud's 100% Azure focus, you can rely on our expertise to guide you through a seamless transition and realize the full potential of your data analytics capabilities.**

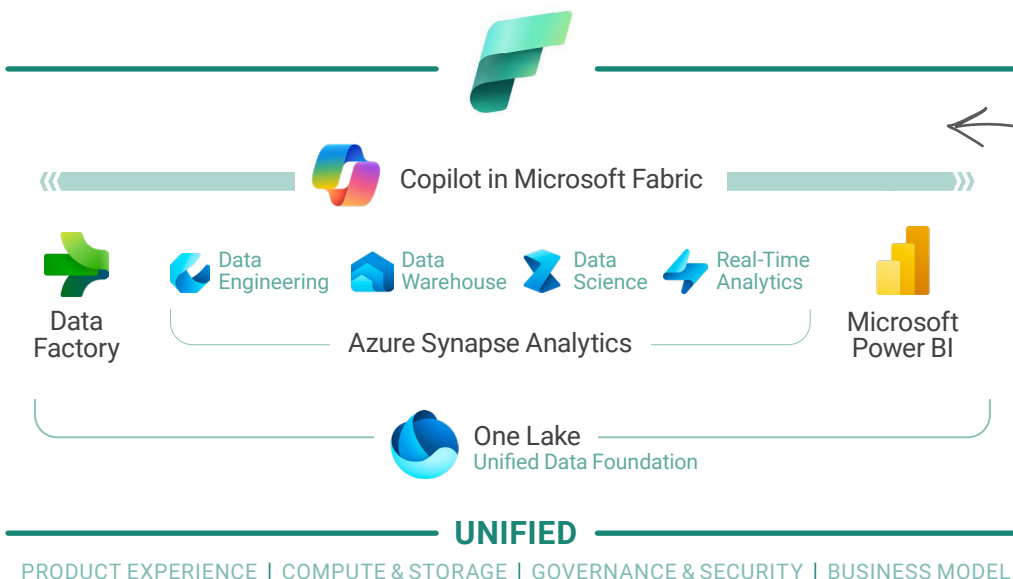

The Power of Microsoft Fabric

Microsoft Fabric is an all-encompassing, AI-powered data analytics management platform. It integrates data lake, data engineering, data integration, analytics and business intelligence into a single SaaS solution. This unified platform simplifies data management, and accelerates insights, making it a powerful tool for modern enterprises.

Microsoft Fabric Focus

- **Future Development**
Microsoft is focusing heavily on Fabric.
- **Copilot Integration**
Copilot, powered by GenAI, enables AI-driven analytics
- **Synapse Toolset**
No enhancements planned, ensuring Fabric is the future.
- **Power BI Transition**
P SKUs will convert to Fabric F SKUs for unified analytics.

A unified system that streamlines data, usage & project management to foster collaboration, resulting in faster insights, better decision-making & enhanced productivity.

Benefits of Migrating to Microsoft Fabric

Microsoft commissioned Forrester to conduct a Total Economic Impact™ (TEI) study to examine the potential return on investment (ROI) enterprises may realize by deploying Fabric. **Here's what they found:**

QUANTITATIVE BENEFITS

Enhanced Business Results
Better insights
increased profits by \$3.6M.

Improved Productivity
Streamlining data access
saved **\$1.8M** & boosted
productivity by **25%.**

Eliminated Cost
Retiring outdated systems
saved \$779,000.

QUALITATIVE BENEFITS

Enhanced Analytics + Upskilling
Access to new datasets fostered
skill development & innovation.

Improved Team Alignment
Unified data access encouraged
collaboration, improving analysis
& team cohesion.

Heightened Data Governance
Unified governance led to better
management & more automation.

ECONOMIC VALUE of migration

379%

Return on
Investment (ROI)

\$9.8M

Why 3Cloud?

Our team of experts has successfully guided numerous customers in their migration from Synapse to Microsoft Fabric and helped them fully leverage Fabric's capabilities. We've enhanced data management and analytics for clients in healthcare, financial services and manufacturing.

3Cloud's Metadata Framework (MDF) works with Fabric Migration Assistant to streamline data ingestion, reducing development time from weeks to days. MDF is flexible and customizable, providing an ingestion process with robust logging and error handling, ensuring a smooth migration. It also includes ongoing support and maintenance, simplifying adaptation and integration with existing technologies.

Our Metadata Framework

- **Faster Migration**
Reduce data ingestion time from weeks to days.
- **Customized Solutions**
Flexible framework to meet your needs.
- **Proven Quality**
Our processes & support ensures data quality.
