

MEET MILO

Where human intelligence
meets AI innovation.

MILO is 3Cloud's AI-augmented delivery methodology and tools that accelerates project timelines, increases quality, reduces risk and improves outcomes by **combining expert consultants with intelligent automation.**

Human powered, AI-driven.

At 3Cloud, we believe the true power of transformation lies in connecting human intelligence with AI to create a community of solvers that drives impact at speed and scale for our clients. That belief isn't just a philosophy, it's how we work. MILO is our way of putting it into practice. Every engagement starts with our people: experts who bring deep technical knowledge and strategic insight. MILO supports them with intelligent automation that helps us innovate faster, deliver with greater precision and create measurable business value.

It's flexible enough to fit any engagement, and powerful enough to make a difference in every one.

How MILO powers smart delivery.

MILO has five capability categories that work together to accelerate delivery, improve quality and reduce risk – each designed to bring speed, consistency and intelligence to every phase of a project.

CAPABILITY	WHAT IT DOES
 AGENTS	AI-powered agents automate tasks, surface insights and speed up delivery
 ACCELERATORS	Prebuilt code or technology, often AI-enabled for high-quality solutions
 COMPONENTS	Reusable UI and/or code libraries simplify builds and unify user experiences
 FRAMEWORKS	Proven guides leverage delivery best practices and streamline delivery
 THIRD PARTY	Commercial or open source technologies essential to project execution.

Innovation in action, not just in theory.

While others are in proof-of-concept mode, MILO is already enabling real results in over 1,000 enterprise client environments through proven, repeatable delivery patterns. **Here are some impressive results:**

- Client onboarding time dropped **by 90+%**, powered by MILO unlocking rapid set up and deep insights into each client's business and history.
- Using MILO's automated data validation, consultants surfaced system misalignments early, preventing rework and **reclaiming 40+ hours per issue**.
- In a recent intelligent platform engagement, MILO **accelerated delivery by 4 months**, saving over **\$2M in operational costs** for a major healthcare client

90% faster client onboarding

40+ hours saved per issue

\$2M cost savings

120 day acceleration in delivery

Designed to drive efficiency without adding overhead, MILO empowers teams to do more with less – boosting productivity and accelerating timelines. By fusing intelligent automation with proven delivery practices, MILO enables scalable innovation while preserving the governance, consistency and control essential in complex enterprise environments. With 3Cloud's MILO, risk is reduced, outcomes are elevated and transformation happens at the speed your business demands.

Your next Azure engagement may be eligible for Microsoft funding

Accelerate Your Azure Journey with 3Cloud

3Cloud is the premier pure-play Azure partner in the ecosystem with unparalleled expertise in all things Azure. We specialize in delivering top-tier Azure infrastructure, cutting-edge AI, robust data & analytics and ground-breaking app development. Leveraging our extensive experience, advanced tools and customized accelerators, we ensure the quickest time to value for your Azure-based projects.

*Microsoft Partner Top Honors since 2017. Visit 3cloudsolutions.com for a full list of awards.
