Production Company Transforms Reporting with Azure & Power BI

Azure Synapse Link

Azure Data Lake Storage

Azure Databricks

Microsoft Power BI

PROBLEM:

- Fragmented data pipelines & limited financial visibility
- Inconsistent reporting; weak governance & performance
- ERP integration, transformation standardization & access control challenges

SOLUTION:

- Built a scalable data platform with automated ERP ingestion, Databricks transformations & curated Power BI reporting
- Reduced reporting time, strengthened data governance & delivered validated financial insights
- Enabled long-term scalability through team training & documentation
