

MANAGED APPDEV

Deliver Apps Faster, Smarter & With Confidence.

Your custom applications are critical to business success. 3Cloud's Managed AppDev Services provide end-to-end support for Azure-based custom applications, ensuring performance, reliability and continuous improvement. From development and testing to monitoring and release management, we help your teams stay focused on innovation while we handle the day-to-day operations.

Enhanced Applications, Delivered Consistently & Reliably

We provide full lifecycle support for Azure-based applications, helping you build, enhance and maintain reliable solutions that align with your business goals.

- App development & enhancements (.NET, Microsoft custom apps)
- Bug fixes & remediation
- Development testing & QA
- App architecture support
- Version Control: Git, GitHub, Azure Repos
- Branch Strategy: Main-feature merge
- Release management
- App maintenance & administration
- App security reviews
- Advisory services & strategic guidance

Why Use 3Cloud's Managed AppDev Services?

Lower Costs: Reduce IT expenses with our expertise and scale.

Focus on Core Business: Free internal resources for strategic priorities.

Specialized Expertise: Quick, easy access to expert skills not available in-house.

Operational Efficiency: Boost IT performance and stability.

Higher Uptime: Improve application reliability.

Stronger Security: Enhance protection with our security-focused experts.

Regulatory Compliance: Ensure adherence to industry regulations.

Performance Monitoring & Management

Our team ensures your applications remain stable and performant through monitoring, incident response and data-driven performance analysis.

- 24x7 application monitoring
- Incident response, triage & escalation
- App insights for performance monitoring
- Proactive performance tracking
- Reactive incident analysis
- Application performance remediation
- Metric & usage reviews

Continuous Improvement & Advisory

Recurring strategy sessions and backlog planning ensures your application roadmap evolves with your business. Our experts provide hands-on support and strategic guidance to help you:

- Reduce deployment risk
- Improve application performance
- Strengthen security posture
- Align enhancements with business outcomes

The 3Cloud Advantage

Whether you need a partner to fully manage your custom apps or supplement your internal development team, 3Cloud's Managed AppDev Services help you stay focused on innovation, performance and business growth. With deep expertise in Microsoft Azure technologies and a commitment to continuous improvement, we ensure your apps evolve with your business.

Your next Azure engagement may be eligible for Microsoft funding

Accelerate Your Azure Journey with 3Cloud

3Cloud is the premier pure-play Azure partner in the ecosystem with unparalleled expertise in all things Azure. We specialize in delivering top-tier Azure infrastructure, cutting-edge AI, robust data & analytics and ground-breaking app development. Leveraging our extensive experience, advanced tools and customized accelerators, we ensure the quickest time to value for your Azure-based projects.
