

MANAGED DEVOPS

Accelerate delivery, reduce risk and scale confidently..

Modern cloud environments demand speed, precision and governance. From build and release pipelines to security, automation and platform administration, 3Cloud's Managed DevOps Services help your teams focus on innovation by providing expert support across your DevOps lifecycle.

We partner with you to streamline operations, enforce best practices and continuously improve your DevOps maturity across data, application and infrastructure.

Focus on Innovation. Accelerate Delivery.

Proactive Pipeline Management: Ensure reliable, secure and efficient CI/CD pipelines across your environments, reducing deployment risk and improving release velocity.

24x7 Support & Administration: Expert support of Azure DevOps tools including boards, repos, pipelines, test plans and artifacts, plus GitHub and Azure repo integration.

Security & Governance: DevSecOps advisement to embed security into your workflows, enforce branch strategies and maintain compliance across environments.

Continuous Improvement & Advisory: Recurring strategy sessions and backlog planning to align enhancements with business goals and ensure long-term DevOps success.

Managed DevOps Core Capabilities

- CI/CD pipeline management
- Release management
- Advisory services & strategic guidance
- **Version Control:** Git, GitHub, Azure Repos
- **Branch Strategy:** main-feature merge
- **Azure DevOps Administration:** boards, repos, pipelines, test plans, artifacts

Managed Data Services Offering

Service Focus Areas

- Data Platform & Business Intelligence
- Azure Data Services: ADF, Synapse, Fabric, Databases
- Business Intelligence: Power BI, Fabric

App Innovation

- Azure Application Services: code, test, package, deploy

Infrastructure

- Infrastructure as Code (IaC)
- Azure Kubernetes

Strategic Partnership for DevOps Success

We provide hands-on support and strategic guidance to help you:

- Reduce deployment risk
- Improve release velocity
- Strengthen security posture
- Align DevOps with business outcomes

The 3Cloud Advantage

Whether you need a partner to fully manage your DevOps lifecycle or supplement your internal teams, 3Cloud's Managed DevOps Services help you accelerate delivery, enforce governance and scale confidently. With deep expertise in Azure and a commitment to continuous improvement, we ensure your DevOps practices evolve with your business.

Your next Azure engagement may be eligible for Microsoft funding.

Accelerate Your Azure Journey with 3Cloud

3Cloud is the premier pure-play Azure partner in the ecosystem with unparalleled expertise in all things Azure. We specialize in delivering top-tier Azure infrastructure, cutting-edge AI, robust data & analytics and ground-breaking app development. Leveraging our extensive experience, advanced tools and customized accelerators, we ensure the quickest time to value for your Azure-based projects.
